SUMMARY

Flutter Developer focused on turning real-world problems into simple, reliable, and thoughtful mobile experiences. Experienced in building API-driven applications across logistics, fintech, and education, with a strong focus on clean UI, maintainable architecture, and user-centered product design.

EXPERIENCE

Flutter Developer — Salayan 2024 – 2026 · On-site & Remote

Started as a Flutter Intern and progressed into a Flutter Developer, contributing to logistics and fintech products.

Built API-driven features including authentication, digital wallets, transactions, notifications, and multi-step KYC workflows.

Flutter · Dart · REST API · Bloc · Provider · Google Authentication · Clean Architecture

Android Developer — Hyro Plast 2023 – 2024 · On-site & Remote

Built and published a commercial Android product catalog for a real business, helping customers explore products and submit purchase requests.

Java · Android Studio · XML
